“Delivering quality products and services through innovative usage of technology”

INTRODUCTION

Amity Software Systems Limited is a CMMI Level 5 Company headquartered at Noida India. It majorly operates in Indian, North American, African, and markets.

Amity has been a pioneer in providing customized Software & Smart Card technology based products and solutions for different industry segments ranging from Agriculture, Banking, Retail, Cement, Insurance to e-Governance, commodity industries like Tea, Coffee and Sugar, EnvironmentConservation and Health sector. With deep understanding of technology and its width of domain knowledge, Amity Software Systems Limited has path breaking solutions, many first-of-their kinds, to its credit. Amity Software Systems Limited is SAP Partner in India, East Africa and USA.

It has been working with technology leaders to integrate and offer technology advantage to its customers, to make products & solutions simpler and user friendly thereby offering cost effective solutions. The company has a reputation for developing innovative Turnkey customized solutions, on time and to budge. This has translated into almost 100 % repeat business from its client base across all verticals.

Some key factors that differentiate us from the other organizations are:

- ✦ **Domain Expertise**
- ✦ **Global Footprint**
- ✦ **Operational Excellence**
- ✦ **Innovation**
- ✦ **Result-Oriented Partnership Model**

Major offerings by Amity Software Systems Limited include:

- ✦ **Bespoke Software Development**
- ✦ **Mobile Application Development**
- ✦ **SAP ERP License Sales and Implementations.**
- ✦ **Offering Proprietary Solutions comprising of Software as well as Equipment.**
- ✦ **Execute I.T. Projects on B.O.O.T. and B.O.O.M. basis.**
- ✦ **Hosting Web Applications & Portals.**
- ✦ **Field Engineering services for our Weighment System and Hand-held customers.**
- ✦ **Technical Consulting**

Today, our expertise extends from application and product development to providing consulting services for system integration, business process re-engineering, smart cards, and RFID technology. In many cases, we have been the first to identify the need and develop the solution.

10. PAPER & PULP

1 AGRICULTURE

Amity has incorporated industry best practices of the agriculture industry, gained from implementation and use of our solutions for mission-critical operations in 150+ companies, using the latest technologies to build robust and scalable products and solutions. All our systems are designed to leverage latest technologies to integrate all stakeholders and streamline the operations to bring in productivity, transparency and efficiency. Our solutions provide a scope for removing disconnect between different stakeholders of the industry.

2 FINANCIAL SERVICES

Amity's Asset Management solution enables effective management and adherence to changing regulatory compliances. Agile, fast and predictive analytics manage risk and evolve strategies that anticipate market trends and take timely decisions for investment or disposal of assets.

INDUSTRIES WE CATER

3 e-GOVERNANCE

Amity's solutions are in use in government departments and undertakings at Central, State & City Levels, in India and other countries. We provide services, both as turnkey projects – from design and development to implementation – as well as products and managed e- governance services. Our engagement and revenue models are flexible and tailored as per user requirements, either as an outright bought-out model or as hybrid models like Build-Own-Operate (BOO) and Build- Own-Operate-Transfer (BOOT).

4 INSURANCE

Rapid technological advances and continually evolving business models over the past two decades have revolutionized the insurance business approach, both for companies as well as customers. In today's dynamic paradigm, Amity's solutions are helping client organizations enhance their core business activities, using automation for interpreting as well as streamlining processes, across all core and support activities.

5 REAL ESTATE

Amity's solutions are in use in government departments and undertakings at Central, State & City Levels, in India and other countries. We provide services, both as turnkey projects – from design and development to implementation – as well as products and managed e- governance services. Our engagement and revenue models are flexible and tailored as per user requirements, either as an outright bought-out model or as hybrid models like Build-Own-Operate (BOO) and Build- Own-Operate-Transfer (BOOT).

6 RETAIL

Companies in the retail sector are always striving to maintain their competitive edge by improving customer engagement. Solutions that harness ever-evolving technologies to address increasing expectations of customers can play a pivotal role, not only in servicing customer requirements, but also, in enhancing their overall experience. Amity's offerings are geared towards building personalized solutions to improve both their efficacy as well as customer retention.

INDUSTRIES WE CATER

7 CEMENT

Cement industry involves heavy weight processes and heavy traffic flow. Manual operations lead to high costs and low efficiency along with errors which poses a great loss for the industry. Amity with its solutions for smart weight and vehicle tracking system has mitigated these challenges to a great extent.

8 METAL

Weighing in metal and minerals industry is critical and integral to the business right from inward movement of raw material to outward movement of finished goods. In order to maintain consistency and accuracy in these operations, Amity has developed solutions like smart weight and vehicle tracking that make the complete operations efficient and effective.

9 MINING

Weighing in metal and minerals industry is critical and integral to the business right from inward movement of raw material to outward movement of finished goods. In order to maintain consistency and accuracy in these operations, Amity has developed solutions like smart weight and vehicle tracking that make the complete operations efficient and effective.

10 PAPER & PULP

Paper and Pulp industry involves processes like heavy weight and inward and outward traffic. These are critical and integral to the business and manual operations for the same leads to losses in terms of time and cost. In order to improve efficiency and optimize the costs, Amity has developed its smart solutions which cater to these problems of the paper industry.

AGRICULTURE MANAGEMENT SYSTEM

Amity's Agricultural Management System has been designed for handling the entire process cycle of an agricultural crop, right from land recruitment, planting of crop, monitoring supply of field inputs (fertilizer, seed etc.), crop growth monitoring, harvest planning, harvesting management, weighing of produce, payments against the produce, comprehensive farmer loans & accounting and contractors accounting. Our AMS includes every aspect of activity for an Agro industry like Sugar, Tea, Coffee, Seed and Horticulture and is integrated with an underlying workflow engine, based on user-defined parameters. AMS allows an improved focus on employee productivity due to availability of the 'Job Queue' section, which lists out the daily work schedule for each module used. Worldwide, this is the most comprehensive software package for Agro industry.

SAP PARTNERSHIP

SAP is the worldwide leader in providing Enterprise Resource Planning software. It has more than 183,000 customer organizations spread across 120 countries, covering 25 industries. SAP has been in the forefront for last 35+years and being able to innovate and provide cutting-edge technology solution consistently.

Amity Software is the partner for sales and implementation of internationally SAP ERP including the latest versions and S/4 HANA version 1610. Our partnership for SAP extends to India, Africa, as well as to US.

We have implemented SAP in many organizations across various verticals and therefore understand complexities and challenges of successful **SAP** implementation. We are experts in **HANA** based implementations, **S/4 HANA**, and **AI**. We offer a value for spend pricing and flexible delivery models. We bring the business benefits and knowledge of best business practices in one company / country /continent to our clients in other geographies

Amity Software also specializes in IT consulting for SAP projects with back end support from our India office. We specialize in delivering the solutions in line with today's Internet technology, database and client-server needs by providing highly skilled consultants and consulting services. We place specific emphasis on customer-focused IT solutions, value added partnerships, delivering technology awareness, application development, implementation, and support services.

SMART WEIGHMENT SYSTEM

The Smart Weighment System automates the entire weighing operation in factories making it operator-less. It has been designed along workflow, followed in weighing process. This system allows the vehicle driver to carry out weighing at the weighbridge, with the assistance of a voice-guided system, without any need of weighing operator. This system enables a major reduction in manpower resources and paper work. It can also be integrated with the existing ERP like SAP or Oracle Applications used in the company for a more streamlined functionality.

FIELD WEIGHMENT SYSTEM (FWS)

The Smart Weighment System automates the entire weighing operation in factories making it operator-less. It has been designed along workflow, followed in weighing process. This system allows the vehicle driver to carry out weighing at the weighbridge, with the assistance of a voice-guided system, without any need of weighing operator. This system enables a major reduction in manpower resources and paper work. It can also be integrated with the existing ERP like SAP or Oracle Applications used in the company for a more streamlined functionality.

KISAAN.NET

Kisaan.net is a web portal developed by Amity offered as a path-breaking solution to sugar factories for farmers. It provides the farmer complete information related to the sugarcane crop from planting to supply. It includes harvest schedules, delivery schedules, status of payment and other related intimations on a real-time basis.

Kisaan.net, the first-of-its-kind holistic solution for farmers, is offered by over 70 sugar factories in North India.

Available as both a web portal and mobile app, **Kisaan.net** provides the current status for farmers to access online as well as on request through SMS. Easy-to-use and available in English and Hindi, **Kisaan.net** today connects over 6 million farmers to sugar factories. **Kisaan.net** has been instrumental in bringing factories and farmers together, with aligned objectives, thereby forging a strong relationship based on trust.

CANE MANAGEMENT SYSTEM

Amity has developed a CMS solution for the farmers who are concerned about the productivity and quality of their crop, requiring a planned and consistent approach from soil assessment to ensuring a healthy crop. Further, delivery farmers are concerned about transparency, as the reliance on operators presents an opportunity for willful or inadvertent errors during weighing and validity check.

CMS offers pre-calendaring activities, calendaring & indenting, cane purchases, out centre Management and grower payments.

PULSE ERP

Amity Pulse-ERP is designed to address the specific requirements of agro-industry in remote locations in India. The challenges that Pulse-ERP addresses include ease of operation, support of unique local business practices and cost efficacy, while still delivering on all aspects of an ERP. Pulse is used extensively, especially in the sugar factories with over 100 users. Integrated with Amity's solution for Cane Management System, Out Centre Weighment and Land Survey, Amity Pulse-ERP provides a single window, comprehensive solution for sugar industry.

SMART CARD & RFID PROJECTS

Amity Software is a pioneer in the **Smart Card** industry, and provides a range of services starting from one-window solutions built around smart cards to supply of **Smart Card** components. Our expertise lies in design and development of bespoke smart card based solutions using **Smart Cards** and **RFID** labels & tags. As **Smart Card** can hold large amount of data and capture transaction details as per process requirements in offline mode, it can be used in various Industry segments to provide cost effective solutions.

Multiple applications can be held on a single card and also the data on a **Smart Card** can be protected against unauthorized viewing.

VEHICLE TRACKING SYSTEM

Amity Software provides web based solution encompassing vehicle tracking, vehicle inventory, allocation, maintenance, cost management, etc. It extends full control to define and manage routes, monitor driving habits, violations and take actions with the capability to immobilize vehicle if so desired. Amity's Vehicle Tracking System (VTS) is designed for addressing the unique requirements of our users, presenting an integrated, complete solution combining state-of-the-art technologies combined with Amity's Industry-proven software. Amity's VTS system, while addressing vehicle tracking operations, also aligns with the core functioning of the user organization.

SOLID WASTE DISPOSAL MONITORING SYSTEM

We have developed a Solid Waste Disposal Monitoring System which enables the organization concerned to monitor vehicles on-the-move, on a computer screen in a real time mode and control entire operation more effectively. The system helps in utilizing both man and machinery in a coordinated manner to achieve higher efficiency and productivity. The proposed solution has been designed using the latest technologies such as GPS, GIS, GSM Network, RFID Tags, etc. to provide a comprehensive solution to overcome problems in the current manual system.

The solution ensures real time monitoring of various activities associated with the existing system of collection of garbage from primary locations like road sides and other intermediate locations and transportation of the same for final disposal.

WEBSITE & MOBILE APP DESIGN, DEVELOPMENT

Amity Software Systems Limited has designed and developed various websites for many of its clients over the years. It has developed a corporate enterprise web portal especially designed to cater to airport authorities. It is currently in use at Airport Authority of India (AAI), a premier organization managing air traffic control operations, serving more than 125 airports across India. **Amity's web portal** is built for scale, to address existing as well as future growth demands of AAI for use by both an ever-growing worldwide clientele as well as its 18000+ employees.

Amity has also developed a mobile app, AirSewa which enhances the travel experience for air passengers by offering convenient and real-time updates on flight status/schedule information, airport information and FAQs. Accessible both through an interactive web portal as well as through a mobile app (available on both Android and iOS platforms), AirSewa also includes a complete grievance redressal system, integrated with back office operations for grievance handling.

INSURANCE MANAGEMENT SYSTEM

Amity's Insurance Management System is a comprehensive Insurance suite which assists Insurance companies by supporting their core Insurance operations, including new business, underwriting, distribution channel management, policy administration, claims management, Insurance accounting, reinsurance, etc. The solution is geared to help reduce operational costs while delivering excellent customer service.

Amity's solutions for the Insurance sector are:

AMITY ASSURE

For life Insurance companies

AMITY INSURE

For General Insurance companies

AMITY IBROKER

For Insurance brokers

AMITY'S REAL ESTATE MANAGEMENT SYSTEM (REMS)

(Real Estate Management System), is an advanced, state-of-the-art solution encompassing all requirements across all workflows of real estate operations, serving as a complete ERP system for real estate companies. It covers all operations from land acquisition to project management, lead generation to sales, financial management, material management, titles and deed management.

COMMODITY GRADING SYSTEM

The Commodity Grading System is an integrated application for management of Grading Operations. It is integrated with the website and online sample entry system to collect samples from different warehouses, farms etc.

It is a complete solution developed by Amity which provides a full scope of weighing, grading data management and report generation.

E-GOVERNANCE PROJECTS

Amity has developed various **E-Governance** solutions that have been designed using state of the art technologies such as GPS, GIS, GSM Network, RFID Tags, etc. These solutions ensure real time monitoring and also provide real-time data of the various activities associated with the existing system. This improves the effectiveness and reduces errors in the system. We have provided Public Distribution System, Electronic Benefits Transfer, Identification cards, E-District, E-Panchayat, Land Records for various state governments across India.

RECYCLING INDUSTRY APPLICATIONS

Amity offers recycling industry applications which helps in eliminating manual data entry and automates the entry process. Data which is entered in the system can be available at real-time and reports can be generated at any time on demand. The system ensures that data integrity and audit trail is maintained.

COMMODITY GRADING SYSTEM

The Commodity Grading System is an integrated application for management of Grading Operations. It is integrated with the website and online sample entry system to collect samples from different warehouses, farms etc.

It is a complete solution developed by Amity which provides a full scope of weighing, grading data management and report generation.

FEW GOVERNMENT PROJECTS UNDERTAKEN BY AMITY SOFTWARE SYSTEMS LIMITED

IN INDIA

1. DLRC Project for Jharkhand Government

A Smart Card based Solution had been implemented for issuance of **Driver license and Vehicle Registration Certificate (DLRC)**. The Smart DLRC allows for the capturing of data at the point of action through a handheld terminal which is issued to law enforcement officers. The data is transferred to the Central database at the end of the day through a transport card in the handheld terminal.

Features offered:

- ✦ **Easy way of registering driver license with the help of DLRC.**
- ✦ **Hand Held Devices used for the data transfer of DLRC.**
- ✦ **More efficiency in issuance of license and vehicle registration process.**
- ✦ **Technologies have innovatively improved on DLRC.**

2. Airport Authority of India – Web Portal

Amity has developed a corporate enterprise web portal especially designed to cater to needs of airport authorities. It is currently in use at Airport Authority of India (AAI), a premier organization managing air traffic control operations, serving more than 125 airports across India. Amity's web portal is built for scale, to address existing as well as future growth demands of AAI for use by both an ever-growing worldwide clientele as well as its 18000+ employees.

Features offered:

- ✦ **Individual category sections.**
- ✦ **Reliable and robust data management.**
- ✦ **Lost and Found system.**

3. East Delhi Municipal Corporation – Solid Waste Monitoring System

Amity's Solid Waste Disposal Monitoring System provides real-time information and alerts that allow all agencies from collection to government, to track, monitor and control the vehicles daily, as they move remotely from a control centre across activities. This has brought in efficiency, predictability and consistency of solid waste disposal operations.

Features offered:

- ✦ Real time vehicle tracking and Geo-fencing to prevent unscheduled/unauthorized halts.
- ✦ View and upload facility of real time pictures of Primary, Secondary and Final Disposal Sites, as well as bins emptied.
- ✦ Automated payments to contractors/ workforce by maintaining status of attendance, fuel issuance, distance covered and other relevant information.
- ✦ Powerful MIS reports and analytics.

4. Weighment Automation for Gujarat Mineral Development Corporation (GMDC)

Complete weighment process for GMDC has been outsourced to Amity Software Systems Limited right from providing workforce to automation of weighing process followed at GMDC. It was a B.O.O.T. project undertaken by Amity Software Systems Limited.

5. SAP ERP Implementation at Kochi Metro Rail Ltd.

KMRL is a Centre-state public sector company that was started with an aim to migrate the citizens from personal mode of transport to public transport. KMRL is the 1st metro system in the country with an integrated multimodal transport system.

For its smooth and efficient working, KMRL team partnered with the Amity Software Systems Ltd. to successfully implement the SAP ERP at KMRL. The scope of ERP included Sales & Distribution and GST modules.

6. Neyveli Lignite Corporation (NLC) – Smart Weighment System

NLC India Limited is a company in the fossil fuel mining sector in India and thermal power generation. Amity successfully implemented its Smart Weighment System for NLC thereby enabling the corporation to improve its efficiency, productivity and cost effectiveness.

7. ERP system at National Seed Corporation (NSC)

Amity is currently working on this project for NSC which involves complete design, development and implementation of Enterprise Resource Planning (ERP) system (Web based software application with secure QR code enabled) to cater the business need of the organization along with an integrated Mobile App.

8. Maintenance of the existing web-based INSPIRE on-line portal and call centre for the implementation of Four INSPIRE Schemes, Development of Mobile Applications including integration with the UMANG Portal.

The objective of organizing the INSPIRE Internship Science Camps is to reveal the joys of creative pursuit of science and innovation to the talented youth of the nation and motivate them to pursue study in science and seek a career later in Research and Development (R&D).

Modules covered under project are as follows:

- ✦ Continuation and maintenance of the existing INSPIRE on-line web-portal (www.online-inspire.gov.in) and associated software applications.
- ✦ Running of a Public Response System (Call Centre) from the premises of INSPIRE Programme Management Unit at ARCI, Gurgaon.
- ✦ Development of Mobile Applications for the INSPIRE on-line web-portal including integration with the UMANG Portal of the Government of India (GOI).
- ✦ Development of any other minor applications, if any required in future for this on-line portal for the implementation of four INSPIRE Schemes (INSPIRE-Internship, Scholarship for Higher Education (SHE), INSPIRE Fellowship and INSPIRE Faculty Fellowship).

Upgrade the Existing technology stack to new tech stack with addition of Mobile App Development as well as additional functionality development as and when suggested by DST Department. Technologies:

For front-end development, we are using ASP.NET 4.0 with C# and HTML5, BOLT Framework

For Back-end, storing of data/record we are using MSSQL Server 2008

Resource Deployed: 07.

We have to maintain the 99.99% up time of Web Application and management of entire Server's connected with the Application in NIC Cloud.

9. Development of Case Management System Software for Delhi Police Crime Department.

Delhi Police Crime department wanted to have a Centralized system for Monitoring Cases.

Development of Web Based Software for Monitoring Cases, where in complete digitization with Quick Access of MIS Case Tracking from Investigation stage to till Trial and CRPC.

Modules covered under project are as follows:

- ✦ Master Data Management
- ✦ User Management
- ✦ Case Management – Case Entry
- ✦ Case Assignment to IO's
- ✦ Case Investigation
- ✦ Filing of Charge Sheet
- ✦ Case Trial
- ✦ Additional Charge Sheet – CRPC
- ✦ MIS Reports
- ✦ Notifications to Users for Specific Events assigned under case.

Complete Digitalization of Manual Process with Quick Access of Case Information and Current status of Case in different-2 stages.

Technologies:

For front-end development, we are using ASP.NET with C# and HTML5

For Back-end, storing of data/record we are using MariaDb 10.X

Resource Deployed: 01

10. Maintenance of existing Web portal & Mobile App, Implementation of QR Code and Designing of new web portal for Standards & Labelling (S&L) Programme of BEE

Bureau of Energy Efficiency (BEE) introduced the Standards and Labeling (S&L) program in 2006 to improve energy efficiency of residential, commercial and industrial appliances/equipment in the country under Energy conservation Act, 2001.

Modules covered under assigned project are as follows:

Maintenance of existing S&L web portal& Mobile Applications

- ✦ Maintenance of existing S&L Web Application, which includes wide range of activities namely, Application submission, Renewal, Degradation/Reallocation, Production data logging , labelling fee payment , Energy savings calculations etc.
- ✦ Integration of new equipment on web portal which includes development of administrative / technical workflow for new appliances as and when launched.
- ✦ Integration of new IAME for the purpose of Application scrutiny/check testing as and when selected by BEE.

Implementation of QR code on star labelled appliances

- ✦ Designing QR code portal for appliance/ equipment which shall be linked with the manufacturer application portal.
- ✦ Issuance of secure QR code sequence in xml format based on the request generated by manufacturer.
- ✦ Track and Traceability feature.

Designing of new web portal with analytics / intelligent features

- ✦ Intelligent capturing of data under Standards & Labelling program.
- ✦ Graphical and tabular representation of data based on various requirements for ex. Production data report, MIS report, Application status report etc.

Upgrade the Existing process with New / Latest Technologies and Implementation of Secure QR Code with trace & Traceability features, so that Consumer has right Appliance/Product and verifies the same at the time of buying by scanning the QR Label.

Technologies:

For front-end development, we are using ASP.NET with C# and HTML5

For Back-end, storing of data/record we are using MSSQL Server 2017

Resource Deployed: Onsite: 03, for supporting the Existing Application. Offsite: 04 For development of New Process and Modules.

11. DMRC- Vendor payment portal Integrated with SAP ERP System

The Vendor Payment Portal system is to empower DMRC Vendors & Authorized Users to View, create, and maintain bills & payments data anytime, anywhere through their Web browser. Reduce effort & time for processing vendor payment. Help Vendors with better traceability & visibility. Reduce physical document data entry, movement and printing. To reduce duplication of manual data input as necessary data submitted by vendor in portal will be moved to SAP system. The Vendor Payment Portal shall work as a Seamless Interface between the Contractor, the Executive and Finance to carry out all billing processes prior to posting the final certified invoice to the SAP, by the finance wing. Currently DMRC is having approx. 6500 Vendor and 750 Finance & Executive Users.

Key Benefits:-

- ✦ Digitalize the payment process at DMRC.
- ✦ Provide a platform to the vendors to track payment status through web browser anywhere and anytime.
- ✦ Allow DMRC to process payment of vendors with minimum effort in no time with no physical file movement.
- ✦ Automatic Vendor Creation, PO Creation, Service Entry Sheet Creation, GRN, Invoice Parking etc. in SAP ERP through vendor payment portal is the key benefits to DMRC in terms of reduce time and cost.

12. Development of Web-portal/Web App and Mobile App. for Sugar Industry & Cane Development Department, Government of Uttar Pradesh.

Developed and implemented Agriculture Management System, CRM for farmers for the Sugar Industry & Cane Development Department, Government of Uttar Pradesh, to simplify the cane procurement process in the state and make it transparent.

Farmer Calendar and Supply Tickets are generated from this system for sugarcane farmers across the state and they can access all information online through "e-ganna" web portal/mobile app.

There are over 5 Million sugarcane farmers registered with this system and majority of them are using our mobile application.

13. Design, Development, Host, Operation and Maintenance of Delhi State Portal and All Associated Websites of Delhi Government.

The Government of NCT of Delhi lays a lot emphasis on the adoption of good governance practices and an important dimension of this is the anytime, anywhere delivery of government information and services to the citizens & end users. For making information of related services and department accessible in a convenient manner, it is important to have a one-stop source for all the government information and services. Putting information in Single Place, there is a need to design and develop the Delhi State Government Web Portal and other Departments Websites with GIGW Compliant and Web2.0 Standards.

Key Benefits:-

- ❖ Complete information availability related to circulated/available Schemes of Delhi Government on single Place, including Tenders, News & Notifications, Circulars, etc.
- ❖ Migrate all the existing websites of Delhi Govt on the new platform with advancements in features and functionalities.
- ❖ Implement robust and scalable architecture in terms of contents, security and load on the websites, so that during the period of Higher traffic, website must be available for end users.
- ❖ Highly sophisticated search across all sites with the option of Advanced Search.
- ❖ To provide an overall excellent user experience to the citizen with ease of Navigation and Option to browse Websites for Physically challenged citizens.

FEW GOVERNMENT PROJECTS UNDERTAKEN BY AMITY SOFTWARE SYSTEMS LIMITED

IN KENYA

1. Kenya Seed Company Ltd.

Amity implemented **SAP ERP** on **SAP HANA** for Kenya Seed enabling it to predict future scenarios more accurately and plan precisely.

Amity offers the complete range of services in **HANA** and elucidates how it can be a value addition to your organization. HANA also includes a programming component that allows a company's IT department to create and run customized application programs on top of **HANA**, as well as a suite of predictive, spatial and text analytics libraries across multiple data sources. Because **HANA** can run in parallel to a source **SAP ERP** application, analysts can access real-time operational and transactional data and not have to wait for a daily or weekly report to run.

2. Electronic Weighing System (EWS) for Kenya Tea Development Agency (KTDA)

Amity's EWS software complimented with Bluetooth enabled weighing scale captures the accurate weight and updates it directly to a centralized Database with the aid of PDA's or Android Based Phones. Weight from the Bluetooth Scale is captured by the PDA directly without any manual intervention ensuring zero manipulation; it also comes with an option of printing weight & farmer details through a Bluetooth printer etc.

3. RH-OBA project for Ministry of Health - Kenya

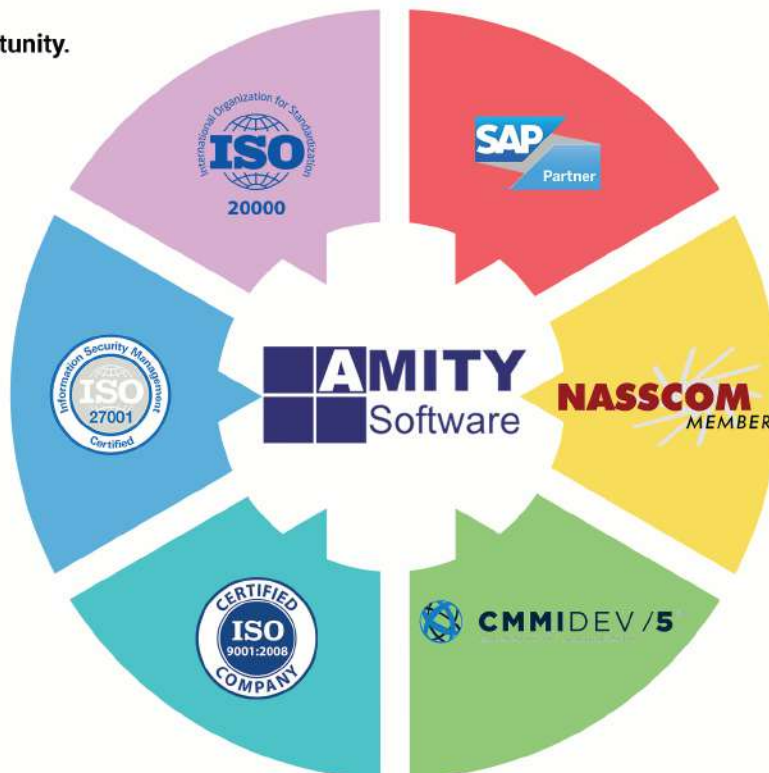

Amity has undertaken 2 projects in Kenya in partnership with PWC.

The RH-OBA project was a UN aided project for the uplifting of women (pregnant women). The project included use of technologies like Hand Held Terminals, Desk Top Terminals, Smart Cards and Software applications.

Pregnant women were provided with smart cards that were registered using HHTs. DTTs were given to all partner health service providers. Pregnant women could visit all the authorized health service facilities and get their checkups done after scanning of their smart cards at the DTTs which fed real time data at the back end.

SALIENT FEATURES

- ✦ Global presence across four continents.
- ✦ Quality Standards: CMMI Level 5, ISO 9001:2015, ISO/IEC 27001: 2013 and ISO/IEC 20000-1:2011 certified.
- ✦ SAP PCoE certified Support Center.
- ✦ Innovative technology.
- ✦ More than 30+ years of experience of serving multiple business segments and industry verticals.
- ✦ Qualified and experienced professionals.
- ✦ Technocrats from various industries with relevant work experience.
- ✦ Strategic differentiation and operational superiority to Clients.
- ✦ Business stability.
- ✦ Fair and ethical business practices.
- ✦ Focus on providing a priceless customer experience.
- ✦ Supplier-Business partnership.
- ✦ Cost effective quality products and services.
- ✦ Equal employment opportunity.

EXPERTISE BANK

1 SOFTWARE DEVELOPMENT

- ✦ .net technology: MVC, ASP.net, HTML 5, C, C++, C#
- ✦ Open source Technology: PHP, Drupal
- ✦ SAP HANA Database
- ✦ SAP S/4 HANA

2 DATABASES

- ✦ Oracle
- ✦ SQL Server
- ✦ My SQL
- ✦ HANA
- ✦ Sybase
- ✦ UNIFY RDBMS
- ✦ MS Access

3 MOBILE PLATFORMS

- ✦ Android
- ✦ iOS
- ✦ Linux

4 OTHERS AREAS

- ✦ Smart Card (Chip Cards with embedded O.S.)
- ✦ Contactless Cards
- ✦ RFID labels & Tags
- ✦ UHF RFID Technology
- ✦ Biometric Technology and matching
- ✦ AMCOS, our own Smart Card Operating System
- ✦ Embedded/Integrated Software

5 INTERFACING

- ✦ Weighbridges
- ✦ Mobile Bluetooth Hanging Scales
- ✦ Various equipment using RS-232, USB, and Ethernet connectivity
- ✦ Integration with SAP

CREDENTIALS

Amity Software Systems Limited holds the following achievements to its credit.

ISO CERTIFICATIONS

- 1. ISO 9001:2015:** Amity has been awarded this certification for maintaining high Quality Management Standards in all of its products and services offerings right from Design, Development and Maintenance of Software, Supply of Weighbridge hardware, after sales services, Smart Card services to Vehicle Tracking System and ERP implementations.
- 2. ISO/IEC 27001: 2013:** Amity has been presented with this certification for following the highest level of Information Security practices in all its products and services offerings right from Design, Development and Maintenance of Software, Supply of Weighbridge hardware, after sales services, Smart Card services to Vehicle Tracking System and ERP implementations.
- 3. ISO/IEC 20000-1:2011:** This is a Service Management System standard which specifies requirements for the service provider to plan, establish, implement, operate, monitor, review, maintain and improve an SMS. The requirements include the design, transition, delivery and improvement of services. Amity has been awarded this certification for maintaining high standards of service management.

NASSCOM MEMBERSHIP

The National Association of Software and Services Companies (NASSCOM) is a not-for-profit Indian consortium created to promote the development of the country's IT (information technology) and business process outsourcing (BPO) industries. Amity being a member of this association holds opportunity of being a part of knowledge sharing and networking platform across the country.

CMMI LEVEL 5 CERTIFICATE

The Capability Maturity Model (CMM) is a methodology used to develop and refine an organization's software development process.

Amity has been appraised at Maturity Level 5 of the Maturity Model Integration for Development, Version 1.3 by KPMG.

This enables Amity to provide all its customers with the highest level of quality standards.

Amity by following the CMMI level 5 drives all its processes with Consistency, Cost saving, Self-improvement and Process improvement.
