“Delivering Quality Products And Services Through Innovative Usage of Technology”

www.AmitySoftware.com

AmityAssure General Insurance Management System is a comprehensive enterprise system, that enables companies to provide coverage to both individuals as well as groups. Incorporating the latest technologies, as well as industry best practices, **AmityAssure** supports all core insurance functions for new business as well as reinsurance. It further blends established technologies and cutting edge tools to provide stakeholders a slew of choices for multi-modal access over web as well as mobile browser-based. The systems is supported in Safari, Google Chrome and Mozilla Firefox.

The Need

Rapid technological advances, and continually evolving business models, over the past two decades have revolutionized the insurance business approach, both for companies as well as customers. Today, customers want minimal human interaction, while companies, too, are interested in providing a seamless environment to facilitate all operational requirements across the process. Today, in this dynamic paradigm, companies have increased their concentration on enhancing their core business activities, using automation for interpreting as well as streamlining processes, across all core and support activities.

Key Benefits

- Enhanced customer experience by removing redundancies, eliminating duplication, and minimizing response time, with real-time alerts on mobile and email.
- System generated underwriting decisions based on business rules.
- Direct online access to customers for evaluation and issuance/purchase of policy without agents, anytime and from anywhere.
- Cost optimization through streamlined processes across operations, efficient utilization of resources, improved productivity, and reduced time-to-market.
- Interpreted and reliable data analytics, enabling informed decision-making, more focused planning and development of best-suited products and solutions for customers.
- Powerful engine to ensure 100% compliance to mandatory/statutory requirements.

- Audit trail for all transactions.
- Reduced time-to-launch at any new location for ease in expansion of business.
- Multi modal access with high response availability and uptime over web and mobile through easy-to use portal and apps for customers, agents and service providers.

Semere Atakilt

Executive Officer - IT Department
Bunna Insurance S.C

“ The **AmityAssure** solution has significantly enhanced Bunna Insurance Company’s business operations by digitizing core processes across policy issuance, claim management, agent performance tracking, and custom servicing. It enabled faster TATs, improved data accuracy, and streamlined workflows, leading to reduced operational overhead. Real-time dashboards and automation empowered better decision-making and compliance. These efficiencies directly contributed to business growth, customer satisfaction, and faster market expansion. ”

About Amity Software

Amity Software Limited is a trusted leader in delivering bespoke software systems, with specialization and expertise in **FinTech** and **AgriTech** solutions. We leverage cutting-edge technologies to address core and unique business challenges in Financial Services and Agriculture industries, and more. Our deep domain knowledge combined with our technological expertise enables us to develop domain-specific software solutions that solve critical problems and enhance operational efficiency.

Our comprehensive approach includes complete end-to-end responsibility for the solution – from conceptualization to implementation – including system design, development & deployment – followed by maintenance & enhancement support. Our unwavering commitment to excellence, and our mission-critical solutions driving the success of their core operations, have positioned us as the trusted partner of choice for our clients.

For the Financial Services industry, our FinTech software solutions, namely, **AmityAssure** (the Insurance Management System for Property & Casualty Insurance, Life & Annuity Insurance, Health & Travel Insurance, Bancassurance, etc.) and **eSmartBank** (for Core Banking) enhance the operational efficiency of our clients in this segment.

For the Agriculture industry, we offer an advanced AgriTech software solution, namely **Agriculture Management System** (AMS), tailored to the unique processes and business lifecycle of various Agricultural commodities (including sugarcane, tea & coffee, and seeds). Our AMS features unique Smart Cards for Farmers, Smart Weighment Systems, Field Data Collection Systems, etc., which integrate seamlessly with third-party Applications and Systems.

In addition to industry specific solutions, Amity Software has a visible presence in the **e-Governance** segment, and the solutioning landscape includes Web Portals and Mobile Apps.
